District CTO Review FAQ

Answers to the questions district CTOs and review boards typically ask.

1. Has the application been reviewed and approved for use elsewhere?

Yes — the Hub has been reviewed and approved by multiple district partners across the United States. We can share existing approvals or put your team in touch with peer districts as references. Email hub@modernclassrooms.org.

2. Will this application be used by students, staff, or both?

Staff only. Teachers and curriculum staff sign in. Students don't have accounts and never interact with the Hub.

3. Who is the target audience?

Teachers and instructional staff at partner districts. MCP sets up or approves each teacher's account, from program enrollment or a roster your district sends. A school email address on its own does not get anyone in.

Per district, we can limit how teachers sign in:

- Magic link sent to their school email.
- Single sign-on only (Google Workspace or Canvas).

Tell us which you'd like; we configure it per district.

4. How will teachers use it?

- Browse classroom-ready curriculum aligned to MCP's instructional model.
- Customize materials for their classes.
- Push materials into Google Classroom or Canvas, or download Common Cartridge files for Schoology.
- Star and organize resources.

No in-app messaging, no student data entry, no grading.

MCP Resource Hub — District CTO Review FAQ

Modern Classrooms Project

5. Does it integrate with existing systems (LMS, SIS)?

The Hub integrates with three LMS platforms when (and only when) a teacher chooses to import:

- **Google Classroom** — direct API push of teacher-selected content.
- **Canvas** — direct API push or downloadable Common Cartridge file.
- **Schoology** — downloadable Common Cartridge file (no API).

The Hub does **not** integrate with any SIS or roster provider. We don't consume student rosters, attendance, or grades.

6. Does it collect, store, or process student information?

No. The Hub does not collect student names, IDs, demographics, enrollment, academic records, assessments, behavioral data, or activity data. We never request student-roster or student-submission API scopes from any LMS.

7. Is it FERPA and COPPA compliant?

- **FERPA** — Because the Hub doesn't handle education records of identified students, the Hub doesn't trigger FERPA's school-official obligations. **We will sign a DPA or no-data attestation on request.**
- **COPPA** — Students under 13 don't use the Hub; there's no path for a student to sign in.

8. Privacy Policy and Terms of Use?

- Privacy Policy
- Terms of Use

9. Who do I contact for a security or privacy review?

Email hub@modernclassrooms.org. We typically respond within one business day and can route review-board questions to the engineering team the same week.
